CASE STUDY: Duval County Public Schools, Jacksonville, Florida

Issue: Duval County, like many other school districts, is continuously challenged when it comes to maintaining their restrooms:

- Grout stains
- Discoloration of grout
- Odors

Solution: MicroGuard's system of cleaners was used to extract the stains and odors. Once the surface was dry, the grout was tinted to regain the consistent coloring that is desired. Finally, our patented inorganic siloxane coating was applied to create a glass-like film. Now, mild, non-toxic cleaners such as Microguard PLC-20 can be used.

Primary Benefits:

- Excellent abrasion resistance (ASTMD406)
- Prevents mold growth (ASTM G-21)
- Improved traction on floor surfaces (ASTM D-2047)
- Eliminates the need for waxing and buffing
- Non-yellowing finish
- Reduced labor in cleaning
- Reduced water usage
