

**Adsil, Inc.****TECHNICAL DATA SHEET TS-47****MicroKleen™ Maintain Neutral pH Cleaner PLC-20**

**DESCRIPTION:** MicroKleen™ PLC-20 is a concentrate formula, neutral pH cleaner designed for the post maintenance of hard tile & grout, epoxy terrazzo, concrete terrazzo, horizontal concrete, exterior hard-scape and other surfaces that have been protected with MicroGuard® product finishes. Whereas this safe-to-use green cleaner is primarily designed for MicroGuard® treated floors, it can also be used to clean Corian®, Formica®, hardwood, laminates and most solid surfaces. Regular use of PLC-20 will not harm MicroGuard® clear finishes. Cleaner dries streak free.

- **Hard Tile & Grout**
- **Epoxy Terrazzo**
- **Concrete Terrazzo**
- **Concrete Floors**
- **Non-ferrous Metals**

MicroKleen™ PLC-20 is a safe and effective post maintenance cleaner for numerous interior and exterior surfaces that have been treated with MicroGuard® clear protective treatments.

**DILUTION:** MicroKleen™ PLC-20 is packaged in one gallon containers as a concentrate formula. Dilution with clean, hot water is recommended, according to the following schedule:

For most general cleaning maintenance, dilute PLC-20 one part cleaner to 10 parts clean, hot water. For light cleaning maintenance, dilute one part cleaner to 20 parts clean, hot water. Product may be used full strength for hard to remove spot staining.

These dilution ratios are good benchmark “rules of thumb”, based on extensive field applications.

**Exercise caution** when working with hot water and MicroKleen™ PLC-20 solutions. Always wear protective glasses and latex gloves.

**NOTE:** *Always try the diluted cleaner on a small, inconspicuous area to determine the dilution ratio is correct for the cleaning requirement.*

**DIRECTIONS FOR USE:**

Apply properly diluted cleaner directly onto the floor surface. Mechanically agitate using floor scrubbers, mops, micro-fiber pads or the like. Pick up residues by dry mopping or extraction equipment.

Allow surface to dry before placing floor back into surface. Cleaner dries streak free.

Post ‘Caution - Wet Floor’ signs when product is in use.

**JOB SITE SAFETY:** Wear safety glasses and latex gloves when working with this MicroKleen™ product. Always read specific label cautions and MSDS before working with any Adsil products.
